

BOLL LACQUER IN AEROSOL FOR PLASTIC BUMPERS

The lacquer for plastic bumpers is a fast drying and well binding paint. It is ideal to paint plastic bumpers and their elements. The paint can be applied directly without any priming or plastifiers on all plastic surfaces.

Application:

Carefully clean and degrease and dry the place to be covered with paint. Cover the adjacent surfaces with paper. Before use, shake the container well for about 3 minutes. Keep the container at a distance of 15-20 cm from the painted surface. **DO NOT APPLY ONTO HEATED PLASTIC ELEMENTS.** After use, turn over the container and spray until the valve is empty.

Drying time: about 60 minutes at 20°C.

Physical properties:

colour:	black/grey/light grey
density (at 20°C):	0.739 g/cm ³
boiling temperature:	-44°C
flash point:	< 0°C
ignition temperature:	365°C
self-ignition:	it does not self-ignite
explosive limit:	upper: 13.0 % vol. / lower: 1.5 % vol.

Comments:

All technical specifications are approximate. We recommend to test the material to make sure it is appropriate for the specific application. The producer reserves the right to improve the product and change its technical properties, including modifications to the specification.
