

## BOLL SOUNDPROOF MAT “FLEX”

The soundproof mat “FLEX” is a very elastic self-adhesive soundproof mat made of a mixture of bitumen, plastifiers, elastomers and fillers of various granularity. It is applied at places exposed to vibrations. It is particularly suitable in places where high elasticity is required at low temperatures.

### Characteristics:

density	1.8-2.0 g/cm <sup>3</sup>
thickness	1.5 mm – 3.5 mm
thickness tolerance	+/- 10%
operating temperature	-20/+80 °C
short-term thermal resistance	+120 °C
storage temperature	+10/+35°C
burning speed (as per UNI ISO 3795)	< 20 mm/min
combustibility (as per FM VSS-302)	SE/NBR class

### Comments:

*All technical specifications are approximate. We recommend to test the material to make sure it is appropriate for the specific application. The producer reserves the right to improve the product and change its technical properties, including modifications to the specification.*
