

BOLL SOUNDPROOF MAT WITH NON WOVEN TISSUE

A very elastic self-adhesive soundproof mat made of a mixture of polymers, plastifiers and fillers of various granularity. It is particularly suitable in places where high elasticity is required at low temperatures. The external surface covered with needled cloth provides a modern finish effect. It can also be lacquered.

Characteristics:

density	1.8-2.0 g/cm ³
thickness	1.5 mm – 3.5 mm
operating temperature	-20/+80 °C
storage temperature	+10/+35°C

Comments:

All technical specifications are approximate. We recommend to test the material to make sure it is appropriate for the specific application. The producer reserves the right to improve the product and change its technical properties, including modifications to the specification.
