

# TECHNICAL DATA SHEET POLISHING PASTE B200

## **PROPERTIES**

Polishing Paste B200 is designed for the most demanding users. Applied after BOLL's B100 polishing paste, ensures the highest quality finish. It is a mildly abrasive paste that eliminates micro-scratches and holograms that may have resulted from previous polishing work. After using B100, when combined with the right polishing pad, it achieves a "mirror" effect. On its own, it is ideal for removing everyday scratches from a car's bodywork, offering a flawless finish.

Cutting force: 4/10Gloss level: 9/10

**COLOUR** 

## **METHOD OF USE**

Apply a small amount of paste to a properly selected polishing sponge attached to the polishing device. Then, using the sponge, spread the paste on a part of the component in question and start polishing starting from the lowest speed. Gradually you can increase the speed of the polishing machine, remembering not to exceed 2,000 rpm. This product can also be used with manual application. The best effect can be obtained after prior application of BOLL B100 paste.

### **INFORMATION**

Do not use on heated elements.

## **APPLICATION**

Mix thoroughly

Can be used by hand or machine

Maximum 2000 rpm

Wipe with a microfiber cloth

Does not contain silicone

# # PHYSICAL PROPERTIES

Density at 20°C: 0,99 g/cm<sup>3</sup>

pH: 8,5

Temperature of use:  $+15^{\circ}\text{C} - +25^{\circ}\text{C}$ 

# **STORAGE**

Protect the product from excessive low and high temperatures. Avoid direct exposure to sunlight. Store in dry places.

## SHELF LIFE

24 months from the date placed on the package.

#### SAFETY

See Safety Data Sheet.

#### **OTHER INFORMATION**

All technical data are approximate values. We advise you to test the material to ensure its suitability for a specific application. The producer reserves the right to improve the product and change the technical conditions with the possibility of making changes inside the specifications.
